# REQUEST FOR INFORMATION (RFI)

## INTRODUCTION

The two photovoltaic (PV) facilities invite businesses located within the Ngwathe Local Municipality and Fezile Dabi District Municipality to register on the project's Supplier Database.

The purpose of this Request for Information (RFI) is to establish a comprehensive database of capable and suitably qualified suppliers and contractors that may be invited to participate in future sourcing, quotation, and tender processes as project requirements arise. The database will serve as a resource for identifying qualified local suppliers and service providers for potential opportunities associated with the future construction, operations and maintenance activities, and social impact initiatives undertaken by the project.

Local businesses, contractors, and service providers are encouraged to submit their company profiles together with the required supporting documentation for inclusion on the Supplier Database and consideration for future procurement opportunities.

Participation in this RFI process does not constitute an award of work, guarantee inclusion in any procurement process, or create any obligation on the part of the project to procure goods or services. The information received will be used solely to assess supplier capabilities and develop a database of potential service providers that align with the project's procurement requirements.

## SCOPE OF SERVICES
